ALUMINUM STORM Doors & Windows

Classic Elegance Storm Door Series

The Classic storm door will add beauty to your entryway-not hide it. The Classic storm door by Seaway, with several durable designs and a multitude of colors, will enrich and compliment any architectural style of home.

The Classic storm door gives you the finest American design and construction. A wide range of custom sizes are available with tempered safety glass. Take a look at some of the quality features and notice the design details that you won't find on other storm doors.

A Beautiful Introduction

One Lite

A large single lite of 70" glass extends your view, and allows sunlight and warmth to stream into your home. It also furnishes a clear, unobstructive view of your entry door and has interchangeable glass and screen inserts.

Deluxe One-Lite

A single lite of 66" glass to enhance your view of the outdoors. It adds beauty and charm to both the entry door and the architecture of your home.

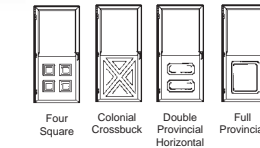

Double Provincial-Vertical

The view's great with this half panel design that lets you enjoy the scenery, while providing durability for high traffic areas. Stylish provincial kick panel with raised relief adds a decorative accent.

Two-Lite Full View

Features center mullion for classic, tasteful styling as well as additional strength and durability. Designed to compliment any style of entry door. Separate glass and screen inserts for top and bottom panels allow any combination of ventilation and glass desired.

Full View

Elegant, sleek design with 74 1/4" glass for maximum view. Let all the natural beauty shine through, lightening and brightening your home, while showcasing the beauty and style of your entry door. Interchangeable glass and screen inserts included.

Hi-Lite

This classic door offers a strong center mullion located lower on the door to effectively display and highlight the beauty of your entry door. Especially attractive with provincial style kick panel.

Even-Lite

Rich with classic styling, yet quite practical, this design features a center mullion for strength and durability in high use areas. Choose your combination: separate glass and screen inserts for top and bottom panel.

Deluxe Hi-Lite

Solid, strong center mullion separates glass into two lites. Individual glass and screen inserts provided for top and bottom panels. Perfect for heavy use areas. * Satin Silver kick panel available

Tri-Lite

A timeless appeal and the features you'll appreciate in this fine storm door include colonial, country look and French Provincial style kick panel with raised pattern.

Self Storing

This self storing half panel door is especially attractive with three operational inserts furnishing both storm protection and ventilation without removing inserts. Designed to stand up to wear and tear of active families.

To Your Home

Quality Features & Benefits

Classic Storm Doors are American designed and manufactured to provide years of reliable, maintenance-free service. Quality-orientated craftsmen complete the assembly.

Snap on Beauty Cap Z-bar covers installation screws and adds a fully finished appearance

Baked acrylic enamel finish resists chipping and scratching. It won't rust and is easy to clean

Four totally enclosed hinges with bronze oil lite bearings for ease of movement and quiet door operation

Sturdy, extruded aluminum frame with .055 wall thickness won't warp, bend, rattle, or lose its weather tight seal

Tempered safety glass furnishes not only protection for the family, but also peace of mind

All hardware is included and adds to the beauty of every Classic door

All kick panels are sealed with butyl caulk and molded in with aluminum angle for added strength and durability

Rust-resistant, galvanized steel corner gussets add robust strength for years of trouble-free service

Slip-in header holds the glass sash in place and includes a drip cap that channels rainwater off the glass. Also an extruded lift handle is provided on the interior of the glass insert to facilitate the safe and easy removal of the glass without the use of tools

Optional insulfill foam filled frame and kick panel adds energy efficiency

Internal bottom expander furnishes a full width seal between the door and sill. It allows full adjustability without scratching the door surface or detracting from the outer appearance of the door

Durable and attractive black aluminum screens are standard; exclusive application keeps screen from pulling out of frame

Time-saving pre-hanging options available.

Polypropylene weather stripping around glass and screen inserts provides a tight seal to keep out wind, weather, dust and dirt
